Crossover Launches Exclusive “Founder’s NFT”

FOR IMMEDIATE RELEASE

Crossover Launches Exclusive “Founder’s NFT” — With 5x Staking Rewards for Early Supporters during the presale period

August 13, 2025 – Crossover, the community-powered crypto project building real value on the Solana blockchain, is proud to announce the launch of its Founder’s NFT — a one-time, exclusive reward for early members.

The Founder’s NFT will be awarded to people who:

1. Join the waitlist at <https://crossovr.io>
2. Participate in the token presale

Community members who hold this NFT in their wallet will enjoy a 5x boost of the NFT rewards (5%), in addition to the regular staking rewards during the presale event on 6mo and 12mo lockup periods. Following the presale, the Founder NFT will provide 1% in extra staking rewards for the user's lifetime — giving them a major advantage as the Crossover ecosystem grows.

What is Staking?

Staking is a way to earn more crypto by locking up your tokens to help secure and support the network. In return, you get rewards — like interest in a savings account, but for crypto. With the Founder’s NFT, those rewards are multiplied by five.

Why This Matters

Crossover is more than just a token. It’s a movement to build real infrastructure on Solana. The project funds Solana validators — the computers that keep the network running — and uses the profits to buy back \$CROSSOVER tokens, creating steady demand and value for holders. This isn’t another meme coin.

Early Support = Lasting Benefits

“The Founder’s NFT is our way of saying thank you to the people who believe in us from the

start. These early supporters are helping us build an ecosystem that can return real value to investors, and they deserve to share in the success."

The Crossover presale is coming September 1, meaning the time to claim your Founder's NFT is already running short.

Early supporters can sign up now at <https://crossovr.io> to claim their place and secure their Founder's NFT.

About Crossover

Crossover is a community-driven crypto initiative that uses investment into the Token to fund real Solana validators and rewards token holders with profits from real infrastructure. By combining community power with blockchain utility, Crossover aims to create a sustainable and transparent ecosystem that produces real value. Not memes. Not hype.
