FOR IMMEDIATE RELEASE

Crossover Announces Presale Launch with Unmatched Staking Opportunities

Community-powered blockchain project offers up to 20% rewards through staking, plus exclusive Founder's NFT benefits

August 22, 2025 – Crossover, the community-powered blockchain initiative building a global network of Solana validators, has announced the details of its highly anticipated presale launching on September 1, 2025. The presale introduces some of the most attractive staking opportunities in crypto today, rewarding participants for supporting the project from the very beginning.

Crossover Tokens will be made available during the presale for \$ 0.001 USD.

Staking Simplified

Staking in the Crossover ecosystem works much like earning interest at a bank, but with higher returns and more flexibility. Instead of leaving tokens idle, community members lock them up for a set period and earn rewards in return.

- 6-Month Staking: Earn 10% interest on staked tokens.
- 12-Month Staking: Earn 15% interest on staked tokens.

Boosted Rewards with Founder's NFT

To celebrate the presale, Crossover is also offering an exclusive Founder's NFT to early supporters who join the waitlist and participate in the presale. Holders of this NFT will receive a 5% staking boost during the pre-sale staking period, increasing their total rewards significantly. Community members who have the Founder's NFT will receive a 1% staking boost forever as a "thank-you" for being with us since the beginning:

- 6 months + Founder's NFT = 15% rewards boost
- 12 months + Founder's NFT = 20% rewards boost

- Founder's NFT = 1% rewards boost forever

"Where else can you get 20% interest on your holdings? These rewards set a new benchmark in staking, while giving our early community members unmatched value."

Driving Long-Term Value

The Crossover presale and staking model are designed to fuel validator growth on the Solana network, creating sustainable demand for \$CROSSOVER tokens. Profits from validators will be reinvested into the ecosystem, buying tokens from the open market and ensuring rewards are backed by real blockchain infrastructure.

About Crossover

Crossover is a crowd-powered project funding Solana validators with community contributions. Unlike speculative meme coins, Crossover is grounded in infrastructure that powers real dApps and delivers real profits. With validator rewards feeding back into the ecosystem, Crossover is redefining how community-driven projects can create lasting value.

Call to Action

The Crossover presale begins September 1, 2025. To secure a spot, join the waitlist at **<https://crossovr.io>** and claim your exclusive Founder's NFT for boosted staking rewards.
