

CROSSOVER WHITEPAPER

INTRODUCTION

The cryptocurrency landscape is plagued by volatility, speculation, and unsustainable token models. Crossover aims to change that by introducing a validator-powered, community-driven ecosystem anchored in real infrastructure and utility. At the core of this initiative is the vision to build a global network of Solana validators, funded by a multi-stage token strategy that distributes validator profits directly back to token holders.

PROJECT OVERVIEW

What is Crossover?

Crossover is part of a crowd-powered, multi-token project designed to evolve from humble meme token beginnings into a professionally managed validator network business. The project has already completed its seed round of financing and has secured enough capital to move into the second phase: the launch of the Crossover Coin.

Vision

To transform crypto from speculation-driven chaos to infrastructure-based sustainability. We're building a validator ecosystem that powers real dApps, shares real profits, and is driven by community governance.

Recent blockchain data shows Solana has seen a 400% transaction volume increase in 2025 due to its high throughput (up to 65,000 transactions per second). Solana processes more than 32 million transactions daily. Those transactions account for more than \$1.8 million in fees every 24 hours. The recent Pump.fun Initial Coin Offering (ICO) raised \$500 million and sold out in minutes. Institutional inflows into Solana have hit \$78 million, signaling strong interest among larger investors. Solana's active addresses are nearing 16 million daily and steady netflows indicate confidence from both retail and institutional investors. The network relies on increasing numbers of validators to allow for its future growth. The team behind Crossover aims to help meet that coming demand, while returning profits to coin holders.

STAGED TOKEN STRATEGY

Stage 1 : Crossover (Cross - [CRoSs8Kvp2zAw6Y2EVFPpv2qjV4Xtz3u6jkUfKdVkoXh](#))

- Purpose: Launch premium token with staking incentives.
- Initial Price: \$0.001
- Initial Supply: 1B (mintable only for pool creation, staking rewards, and during validator onboarding).
- Tokenomics: 20% of validator profits go to Crossover holders.
- Airdrop & Pre-sale staking bonuses (up to 15% APY).

Stage 2: CTHUB

- Purpose: Main utility/governance token of the ecosystem.
- Initial Price: \$1.00
- Initial Supply: 1B (mintable only for pool creation, staking rewards, and during validator onboarding).
- Validator Revenue Allocation: 30% to CTHUB holders.
- Validators added for every \$250M in market cap growth.

VALIDATOR ECONOMICS

What is a Solana Validator?

A Solana validator is like a helper computer that checks and keeps track of all the transactions happening on the Solana network. Imagine Solana as a big digital piggy bank where people send and receive money or other cool stuff. The validator makes sure every transaction is real, fair, and follows the rules.

Validator Revenue Breakdown (Per Validator)

Seed Round Funding (ChillXand) meme coin (Completed)

- Early investment will end up receiving 10% profit return
- 100% crowdfunded token
- Value is in price increase after validators are running (HODL)

Crossover Token: 20% (Pool Distribution)

- Tokenomics: 20% of validator profits go to Crossover holders.
- Pre-sale Start: September 1/2025
- Pre-sale staking: 25% APY for 6 months and a Founder NFT
- Token Launch: Jan 1/2025
Pool creation, and general launch of token @ \$0.001

CTHUB Token: 30% (Pool Distribution)

- Operational Expenses: 15%
- Validator Growth Fund: 25%

Revenue Example (Vanilla Solana Validator)

- Stake: \$5M

- Monthly Earnings: ~\$34,573

- Annual: ~\$414,876

- Result: Significant recurring revenue for token buybacks and holder rewards

TOKENOMICS SNAPSHOT

Tokenomics Snapshot Table

Token	Supply	Initial Price	Validator Share	Distribution Model
-------	--------	---------------	-----------------	--------------------

Cross	(infinite by rules)	\$0.001	20%	Pool Distribution + Staking
CTHUB	(infinite by rules)	\$1.00	30%	Pool + Governance + Staking

ROADMAP

Q3 2025

- Launch Crossover Pre-sale & Staking
- Launch on Raydium
- AirDrop distribution

Q4 2025

- Launch CTHUB (Vanity Token)
- Target \$1B+ market cap

Q1 2026

- Deploy 1st Solana Validator
- Begin profit distribution

2026+

- Deploy new validator every \$250M market cap milestone
- Build global Solana validator network

JOIN THE MOVEMENT

Crossover is more than just a token. It's a movement to shift crypto back toward purpose, sustainability, and community. Join the waitlist, stake your claim, and help build a validator farm powered by people.
